# A brief introduction of the Foxboy Token

FoxBoy was officially launched on 14. november 2021 on the Binance Smart Chain. Following in the footsteps of many other similar projects, Foxboy was ghost-launched (no presale) and all members of the community had the same possibility to aquire the token.

We chose to establish us in a way so artwork and NFTs would be easy to implement later on. By creating the steppingstone and the fuel of the ecosystem, the FoxBoy Token.

Our vision is to create a 3D-NFT marketplace and in the future to be integrated in a "metaverse".

# UTILITY

---

## FoxBoy Token

Foxboy is designed to launch a 3D trading ecosystem hosted by BSC. Our first road map was to create a marketplace where users could purchase a series of 3D animated foxboys. After a successful launch, we realized this is an opportunity.

We plan to launch a fully operational 3d NFT marketplace by the end of the year 2021, where users will be able to buy Foxboy NFTs as well as add additional attributes and "items" to their characters. Each character is your own customizable avatar that you can either use or sell back on the marketplace.

Our next goal is to create a web-based FoxBoy game in which users will be able to compete against other Foxboys for fun or for a reward of FBB tokens. Battles will level up your characters, making them stronger, and that means - they'll be worth even more on the market!

As part of our product, we are planning to support FBB tokens for all transactions, as well as BUSD on the BEP20 network.

Our vision is without limits, so we have many more plans in store for you, which will be discussed in the official v2 whitepaper coming soon!

# MARKETING

1

## 24/7

At Foxboy we believe in 24/7 marketing, our team is constantly pushing forward with the best promotion on all social media, and of course using a strong word of mouth to promote our KYC doxxed developers.

2

## Results

Since day one we have delivered all results promised by the team and will continue to do so until we are at the top of the binance smart chain.

# Tokenomics

- Launch date: 14. nov 2021
- Network: Binance Smart Chain
- Symbol: FBB
- Decimals: 18

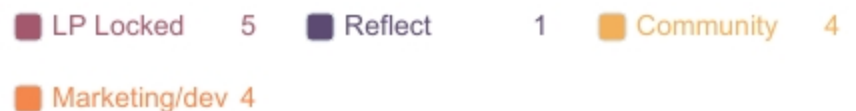

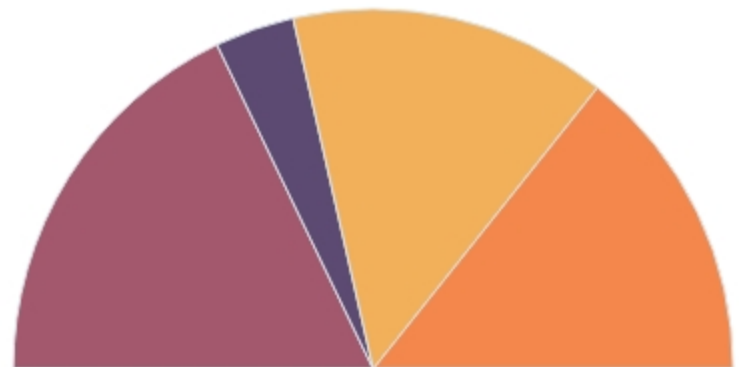

## Token specs

- Supply: 100 000 000 000
- Starting price: 0.00000000099
- Fair launch: Stealth/no dev tokens
- Tax: 14%
